It reduces performance every second.

By 5 AM it's reduced to 50%.

By 6 AM it's reduced to 25%

By 7 AM it's reduced to 15%

Base on individual wake up time BRAIN will pattern performance % for the whole day till following 4 AM

If don't sleep by 11 pm

Kidney's 2nd function won't happened.

If the person doesn't wake up by 4 am Kidney's 3rd function won't happen.

Unless official tasks by policy such as guard, army, night shift workers, etc need to awake at night.

Otherwise, it's wrong time management and it's self-manipulation for memory & health.
